## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/8/09 has been entered.

The terminal disclaimer filed on 9/8/09 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of copending Application No. 10/926,088 has been reviewed and is accepted. The terminal disclaimer has been recorded. The provisional rejection of claims 1, 4, 6-7, and 17 on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-5 and 18-21 of copending Application No. 10/926,088 is withdrawn in view of the terminal disclaimer.

Claims 1, 4-13, and 15-18 are pending and under consideration by the examiner.

### ***Election/Restrictions***

Claim 18 remains withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1, 4, 6-13, 15, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Godowski et al. (U.S. Patent No. 5,316,921) in view of Shimizu (BBRC, 172:321-27, 1992).

This rejection is maintained for reasons of record.

Claims 1, 4-13, 15, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Godowski et al. (U.S. Patent No. 5,316,921) in view of Shimizu (BBRC, 172:321-27, 1992) and further in view of Miyake et al. (U.S. Patent No. 7,125,688) and Miyake et al. (U.S. Patent NO. 7,129,064).

This rejection is maintained for reasons of record.

Claims 1, 4, 6-13, and 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Godowski et al. (U.S. Patent No. 5,316,921) in view of Shimizu (BBRC, 172:321-27, 1992) and further in view of Patten et al. (U.S. Patent No. 6,365,377)

This rejection is maintained for reasons of record.

As set forth in the Advisory Action mailed 8/21/09, applicant's arguments concerning the art rejections are not persuasive. The prior art of record amply documents that unglycosylated HGF would have been active. Mutating all glycosylation sites to prevent glycosylation would have been obvious to one of ordinary skill in the art. It would have made unglycosylated HGF more convenient to produce and permitted production in additional host cells that would have been capable of glycosylation in the absence of such mutation (e.g. mammalian cells or yeast cells).

### ***Conclusion***

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
